Sr. No. of Question Paper : 2850

Unique Paper Code : 61011404

Name of the Paper : Business Research

Name of the Course : Bachelor of Management Studies (BMS), 2019 (CBCS)

Semester : IV

Duration : 3 Hours

Maximum Marks : 75

Instructions for Candidates

1. Write your Roll No. on the top immediately on receipt of this question paper.
2. All questions are compulsory.
3. Use of Simple Calculator is allowed.

1. (a) A study was designed to understand the behaviour of online shoppers. A survey of 1200 online customers was conducted. One of the questions asked was, "Do you feel satisfied with your online shopping experience?" Out of 700 women, 560 said yes and out of 500 men, 340 said yes.

Test at 5% level of significance, can we conclude that the proportion of female satisfied online shoppers is more than male satisfied online shoppers? (7.5)

- (b) The following data were collected for a newly opened restaurant in which 100 male and 106 female customers were asked to rate the food served, on a scale of 1 to 5, where the response 1 signifies: *liked very much*, and the response 5 signifies: *did not like at all*.

Rating by the customers

Gender	1	2	3	4	5
Male	23	37	2	16	22
Female	29	35	7	10	25

Is it appropriate to conclude that the ratings are independent of the gender? Test at 5% level of significance. (7.5)

2. In recent days, environmental issues have received a great deal of discussion in the field of marketing. As the society has become more concerned with the natural environment, businessmen have begun to modify their behaviour to address the society's new concern. With the growing awareness about the

Area under standard normal distribution between the mean and successive value of Z.

implication of global warming, non-bio degradable solid waste, harmful impact of pollutants etc., both marketer and consumers are switching to eco-friendly products and many companies have accepted their responsibility not to harm the environment and not to waste the natural resources.

You are the head of marketing research department of a growing FMCG company, which is contemplating to introduce a new line of eco-friendly products namely, biodegradable disposable plates and cutlery.

Design a questionnaire to study the consumer awareness, perception, the intent to buy and use these products. (15)

3. Amul is exploring the idea to launch camel milk. Soon, it might arrive on your breakfast table. The company has already received approval from the Food Safety and Standards Association of India (FSSAI). Camel milk is considered to have several health benefits, such as high insulin and vitamin content. GCMMF, the country's largest dairy cooperative, which markets milk and milk products under the brand, has approached you to find out if they should enter the Indian market. Prepare a research proposal clearly stating all the stages of the research process to address the above issue. (15)

4. (a) Distinguish between conclusive and exploratory research design using relevant examples. (7.5)
- (b) Describe **four** types of primary scales. Discuss the characteristics and utility of each scale using suitable examples. (7.5)
5. Write short notes on any **two** of the following: (7.5×2)
 - (a) Paired comparison vs. Constant sum scale
 - (b) Stratified Sampling vs. Cluster Sampling
 - (c) In-depth Interview vs. Focus Group method
